

EcoScan: Your AI-Powered Zero Waste Assistant

Scan. Sort. Save the Planet.

OneEarth International Hackathon 2025

National Institute of Technology, Kurukshetra

The Problem: The Recycling Guessing Game

Every day, millions of well-intentioned people throw recyclables in the trash. Why?

Confusion

Complex and ever-changing local recycling rules lead to "wish-cycling"—guessing what can be recycled, often incorrectly.

Contamination

A single wrong item can contaminate an entire batch of recyclables, diverting it all to a landfill. In India, contamination is a primary reason for low recycling efficiency.

Did you know? In urban India, an estimated **60% of all recyclable waste ends up in landfills** due to improper sorting and contamination. This not only wastes valuable resources but also strains already overburdened waste management systems.

Our Solution: EcoScan

We're taking the guesswork out of waste management.

EcoScan is a free mobile app that uses AI to give you instant, clear, and hyper-local disposal instructions. Just snap a picture, and we'll tell you exactly what to do.

How It Works: The Technology

Scan Item

Send Image

Classify Waste

Show Disposal Rule

Key Features: More Than Just Sorting

Instant AI Identification

Accurate classification of over 100 common household waste items, including plastics, paper, glass, metals, and organic waste, with precise disposal guidance.

Gamified Rewards

Earn "Green Points" for every item you sort correctly. Redeem points for exclusive discounts at local sustainable businesses and cafes, fostering a positive feedback loop for pro-environmental behavior and community engagement.

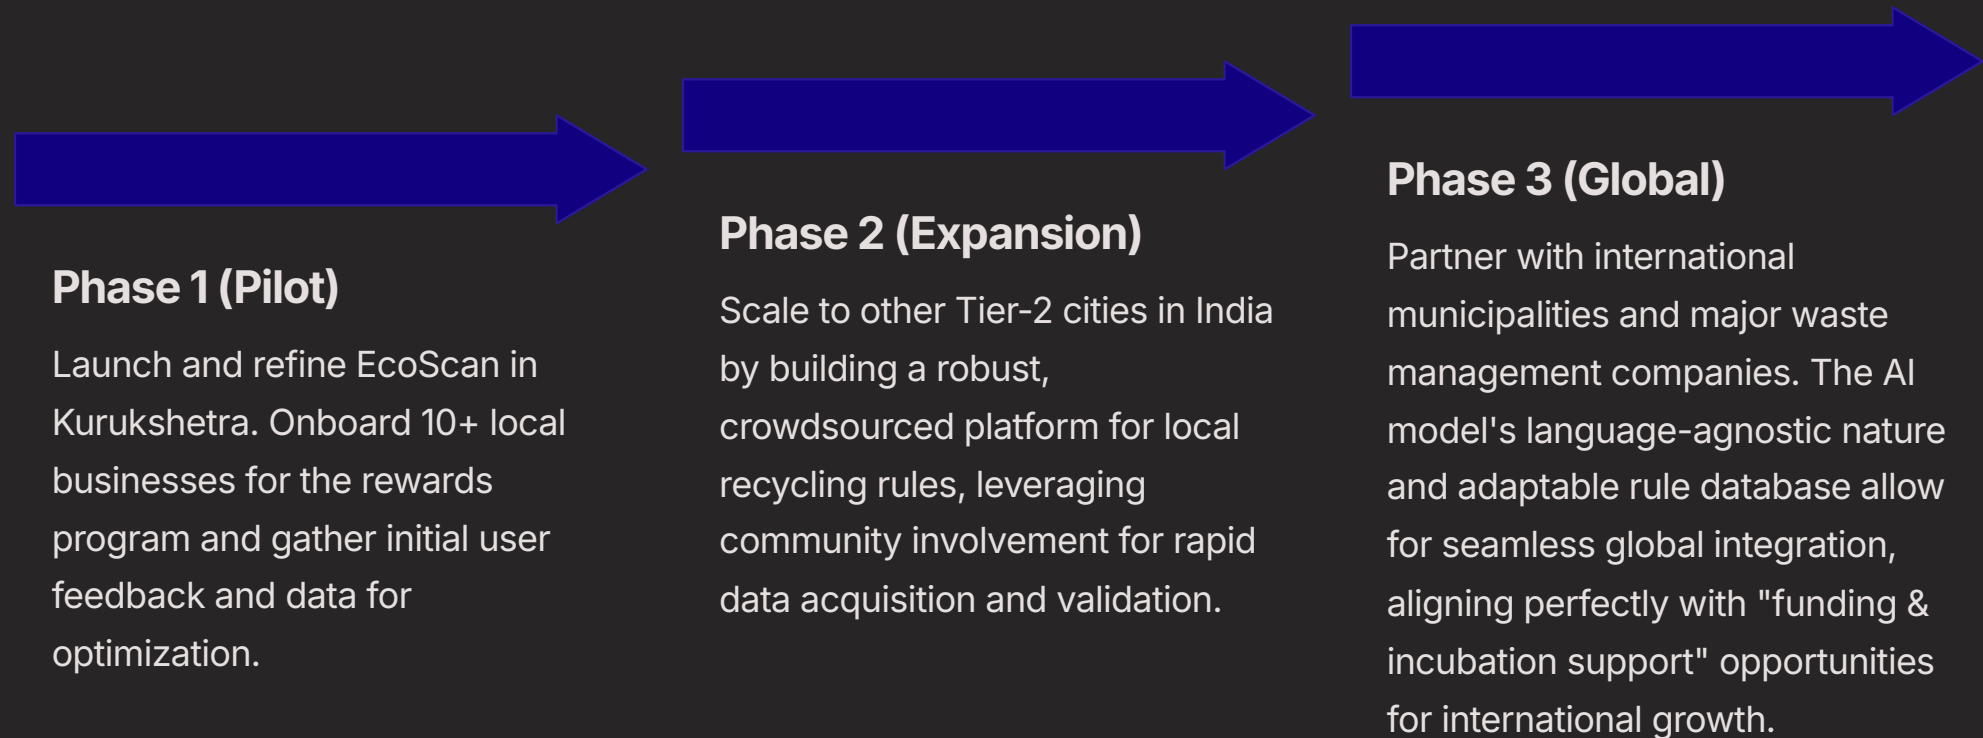

Educational Hub

An interactive platform to learn about your personal environmental impact, track your waste reduction progress, and receive practical tips and resources for sustainable living and reducing your carbon footprint.

The Impact Model: A Win-Win-Win

Market & Scalability: From Kurukshetra to the World

Our Team

Abhishek - Team Lead & AI Specialist

Rishabh - Developer

Praveen - UX/UI Designer

Prakhar - Business & Research Strategist

Sanjay - Pitch & Communications Lead

The Ask & Future Vision

Join us in building a zero-waste future.

Our Ask

We are seeking dedicated mentorship and comprehensive incubation support to refine our business model, optimize our technology, and scale our impact across diverse communities.

Our Vision

To establish EcoScan as the go-to global platform for household waste management, seamlessly integrating into daily lives and turning every citizen into a confident, empowered, and proactive recycler.

Thank You & Contact

Thank you for your time. Let's build a cleaner planet together.
