

# Submission Guidelines

Participants are required to submit a PowerPoint (PPT) presentation consisting of five slides that clearly outline their proposed environmental solution.

## Suggested Structure for Presentation Slides

### 1 Team and Institutional Information

Name of the institution or university or organization

Official institution/university/organization logo

Team name (if applicable)

Names and designated roles of all team members

Contact information (email and phone number of the team leader)

### 2 Environmental Problem Statement

Clearly articulate the environmental issue your team aims to address

Explain the significance of the problem and its impact on local ecosystems or communities

Include relevant data or examples to highlight the urgency and importance of the issue

# OneEarth International Hackathon

Describe your innovative solution to the identified challenge

Detail how technology is integrated to achieve sustainable outcomes

Emphasize the distinctive features of your approach, especially its suitability for the local context

## 4 Impact and Feasibility

Estimate the potential environmental benefits (e.g. CO<sub>2</sub> reduction, water conservation, etc.)

Evaluate the solution's technical and financial viability

Compare your approach to existing solutions, highlighting improvements in sustainability and efficiency

## 5 Implementation and Scalability

Present a realistic implementation plan, including major milestones

Identify anticipated local challenges and proposed strategies for overcoming them

Discuss how the solution can be scaled or adapted to other regions facing similar environmental issues

# Additional Submission Guidelines

## File Format

Presentations must be submitted in PowerPoint format (.ppt or .pptx), with a maximum file size of 10MB. Please ensure all fonts are embedded to prevent formatting issues

# OneEarth International Hackathon

---

## Prototype Demonstration

If a working prototype is available, participants are required to create a 2–3 minute video showcasing the solution's key functionalities and its environmental impact. The video should be uploaded to platforms such as YouTube or Vimeo and the link must be included during the registration process.

## File Naming Convention

Please name your PowerPoint file using the following convention:

TeamName\_Institution\_ChallengeCategory.pptx

Example: XYZ\_UVWUniversity\_CarbonTracking.pptx

## Submission Deadline

All presentations must be submitted by September 30, 2025, at 11:59 PM. Late submissions will not be accepted. To avoid last-minute technical issues, teams are advised to submit their entries well before the deadline.

## Supporting Documentation

Participants may include up to three supplementary pages in an appendix to provide technical details, data sources, calculations or diagrams supporting the proposed solution. These materials should be clearly referenced within the main presentation.

# OneEarth International Hackathon

## OneEarth Hack

One Planet. One Purpose.

Join the 48-hour innovation challenge that brings together students, developers, and sustainability enthusiasts to create tech solutions for environmental and climate issues.
